

Geography — "Our Restless Earth" Flashcards 地理閃卡

Print double-sided, flip on short edge. Orange border = question side · Green border = answer side. Cut along the borders. Built from the teacher's actual PPT definitions.

Plate

板塊

Card 1 — question

Plate boundary

板塊邊界

Card 2 — question

Lithosphere

岩石圈

Card 3 — question

**Which two parts make up the
lithosphere?**

岩石圈由哪兩部分組成？

Card 4 — question

Convection currents

對流

Card 5 — question

Subduction

隱沒

Card 6 — question

Plates move APART

互相遠離

Card 7 — question

Plates move TOWARDS each other

互相靠近

Card 8 — question

Plate

板塊

"The earth's surface land mass is divided up into **pieces called plates.**"

地球表面陸地被分割成稱為「板塊」的碎片。

Card 1 — answer

Plate boundary

板塊邊界

"The **narrow junction** between two moving plates is called a **plate boundary.**"

兩個移動板塊之間狹窄的交界。

Card 2 — answer

Lithosphere

岩石圈

"Consists of the **crust and the uppermost part of the mantle; rigid; solid.**"

由地殼和地幔最上層組成；堅硬；固體。

Card 3 — answer

Which two parts make up the lithosphere?

岩石圈由哪兩部分組成？

(a) The **crust** and the **uppermost part of the mantle.**

(b) They **float and move slowly** on the semi-fluid asthenosphere / mantle.

Card 4 — answer

Convection currents

對流

Hot material rises, cold material sinks.

"The **convection cell drives seafloor spreading and moves the tectonic plates.**"

Card 5 — answer

Subduction

隱沒

One plate **slides beneath** another.

E.g. "Oceanic crust **subducting under Asian continent.**"

Card 6 — answer

Plates move APART

互相遠離

Internal force: **Tension** 張力

Boundary: **Divergent** 分散性

Arrow: $\longleftrightarrow$

Card 7 — answer

Plates move TOWARDS each other

互相靠近

Internal force: **Compression** 擠壓力

Boundary: **Convergent** 聚合性

Arrow: $\rightarrow\leftarrow$

Card 8 — answer

Plates move PAST each other

互相擦過

Card 9 — question

Compressional force

擠壓力

Card 10 — question

Tensional force

張力

Card 11 — question

Shearing force

剪切力

Card 12 — question

Folding

褶曲

Card 13 — question

Faulting

斷層

Card 14 — question

Volcanism

火山活動

Card 15 — question

Fold mountains — Stage 1

褶曲山脈：第一階段

Card 16 — question

Plates move PAST each other

互相擦過

Internal force: **Shear** 剪切力

Boundary: **Transform** 保守性 (also called **conservative**)

Arrow: ↑ ↓

Card 9 — answer

Compressional force

擠壓力

"Generated at **convergent** plate boundary.
The rocks become **shorter and thicker**."

岩石變短變厚。

Card 10 — answer

Tensional force

張力

"Generated at **divergent** plate boundary.
The rocks become **longer and thinner**."

岩石變長變薄。

Card 11 — answer

Shearing force

剪切力

"Generated at **Conservative (transform)** plate boundary.

The rocks **twist in shape**."

岩石扭曲變形。

Card 12 — answer

Folding

褶曲

"Rock layers are **folded up under compressional force**. This process is folding."

岩層在擠壓力下向上彎曲。

Card 13 — answer

Faulting

斷層

"Rocks are **broken and displaced relative to each other**."

The **cracks along which rocks move** are called **faults**."

Card 14 — answer

Volcanism

火山活動

"All the processes related to the **occurrence and the movement of magma**."

Card 15 — answer

Fold mountains — Stage 1

褶曲山脈：第一階段

Ocean-continent collision:

Sediments deposited at the land margin and **compacted into sedimentary rock**.

Oceanic crust subducting under Asian continent.

Volcanoes formed as **magma rises through cracks**.

Card 16 — answer

Fold mountains — Stage 2

褶曲山脉：第二階段

Card 17 — question

Fold mountains — Stage 3

褶曲山脉：第三階段

Card 18 — question

Qomolangma Feng

珠穆朗瑪峰

Card 19 — question

Crater

火山口

Card 20 — question

Vent

火山口通道

Card 21 — question

Magma chamber

岩漿庫

Card 22 — question

Batholith

岩基

Card 23 — question

Pacific Ring of Fire

太平洋火環

Card 24 — question

Fold mountains — Stage 2

褶曲山脉：第二階段

Continent–continent collision:

"Over time, **all the oceanic crust of the Indian subcontinent subducted.**"

The two continents collide **directly.**

Card 17 — answer

Fold mountains — Stage 3

褶曲山脉：第三階段

The rocks at the plate boundary are **crumpled into the Himalayas.**

"Under **compressional force, folding and faulting occur.**"

Card 18 — answer

Qomolangma Feng

珠穆朗瑪峰

8,848 m — the highest peak of the **Himalayas.**

Other fold mountains: **Atlas** (Toubkal 4,165 m),

Rockies, Andes (Aconcagua 6,960 m).

Card 19 — answer

Crater

火山口

"At the top of a volcano, there is a **circular depression called a crater.**"

火山頂部的圓形凹陷。

Card 20 — answer

Vent

火山口通道

The **channel** through which **magma rises** to reach the crater.

岩漿上升到火山口的通道。

Card 21 — answer

Magma chamber

岩漿庫

The **underground reservoir** where magma **collects before rising.**

岩漿上升前聚集的地下儲庫。

Card 22 — answer

Batholith

岩基

"**A dome-shaped chamber, formed deep underground.**"

(= **intrusive** volcanism — magma cooling underground.)

Card 23 — answer

Pacific Ring of Fire

太平洋火環

Active volcanoes are mainly distributed **along plate boundaries,** especially **around the rim of the Pacific Ocean.**

Card 24 — answer

Which plate is Hong Kong on?

香港在哪個板塊上？

Card 25 — question

Eastings

東距

Card 26 — question

Northings

北距

Card 27 — question

L1 / L2 / L3 question levels

提問三層次

Card 28 — question

Which plate is Hong Kong on?

香港在哪個板塊上？

Hong Kong is on the **Eurasian Plate**,
near the Philippine Plate boundary.

香港位於歐亞板塊，接近菲律賓板塊邊界。

Card 25 — answer

Eastings

東距

The **vertical** grid lines; numbers **increase eastward.**

Read FIRST in a four-figure grid reference.

垂直線；向東數字增大；先讀東距。

Card 26 — answer

Northings

北距

The **horizontal** grid lines; numbers **increase northward.**

Read SECOND in a four-figure grid reference.

水平線；向北數字增大；後讀北距。

Card 27 — answer

L1 / L2 / L3 question levels

提問三層次

L1 = Look — just describe (what do you see?)

L2 = Why? — explain (the reason)

L3 = What if? — imagine! (predict a change)

寫完問題後標註 L1/L2/L3。

Card 28 — answer
